

secure your life 24/7

Home

Whether it's for effective property protection, keeping an eye on the elderly, or checking who's at the door — home surveillance brings many benefits. AVer's affordable kits are easy-to-use and come with the ability to monitor the system locally, by mobile phone, and over the Internet, giving homeowners constant reassurance.

Retail

The current economic climate places renewed pressure on retailers to reduce shrinkage and protect ever-tighter margins. Effective surveillance not only provides evidence, but actually discourages theft. AVer DVR/NVRs are compatible with most POS systems, providing video overlay of transaction data for better security management.

Healthcare

Security personnel play a vital role in the healthcare environment — securing costly equipment, preventing the theft of dangerous pharmaceuticals, controlling access, and protecting staff from violence. AVer's total solution gives them the fully integrated surveillance platform that they need to effectively fulfill this role.

Industrial

Surveillance provides vital security for industrial facilities preventing unauthorized entry and theft. In hazardous working areas, IP cameras aid supervision and safety. AVer's total solution can also integrate into production lines giving staff the monitoring tools to prevent stoppages, see faults, and increase productivity.

Commercial

The safety and security of employees, visitors, and property is priority for any commercial organization. With AVer's advanced SDK, vendors can deliver an integrated security solution for commercial sites with motion detectors and access controls. AVer CMS offers central control with the convenience of remote mobile monitoring.

Education

With multiple sites, easy access, large groups, and long hours the education field presents unique challenges for security professionals. Those same professionals have come to realize that IP camera technology and scalable hybrid systems offer a flexible solution for limiting criminal behavior and creating safe campuses.

Banking

Economic hardship increases the risk of robbery anywhere large amounts of cash are present. Banks, credit unions, and currency exchanges know that advanced surveillance plays a key role deterring criminals and protecting staff. Plus, the extra challenges of securing ATMs and drive-thru banking are made easier with AVer's SDK.

► Suggested Applications

application	home	retail (small-scale)	healthcare	industrial	commercial	education	government	public safety	banking	transportation	retail (large-scale)
examples	family homes, apartments, residential communities	convenience stores, bookstores, restaurants/cafes, gas stations	hospitals, clinics, nursing homes	factories, warehouses, power plants, refineries	business plazas, corporate offices, call centers	schools, universities, community centers	national ministries, courthouses, local government	detention centers, police stations, parking lots, pedestrian crossings	banks, ATMs, insurance companies	airports, train/subway station, bus/truck depot	department stores, malls, chain restaurants, supermarkets

* supports up to 4 IP cameras

** NV6000/8000 series capture cards are stackable up to 2 cards to create specialized configurations up to 32CH per PC

► Single Site - Home Surveillance

Multiple Sites with CMS - Chain Retail Store Surveillance

Multiple Sites with CMS - Industrial/Commercial Building Surveillance

Multiple Sites with CMS - Bank Surveillance

Central Management

CM3000/CM3000 Gold retains total authority over your security environment while adding the flexibility and agility of decentralization:

- simultaneous local site management and remote central management
- remote backup to prevent footage loss due to DVR malfunctions
- smart, cost-effective alternative to traditional DVR wiring

AVer's SDK

Integrating surveillance into your home, commercial, or industrial solution is easy with the AVer SDK. AVer's free SDK provides engineers, developers, and systems integrators with the resources and tools needed to write API applications, giving them the power to fulfill diverse security demands.
